*We, at **Daiken Corporation, Japan**, are committed to be an Eco-friendly organization. We will strive to protect, preserve and improve our environment by preventing or minimizing pollution of air, water, etc.*

This we achieve through:

- ❖ Continual improvement of manufacturing processes to reduce wastes and pollution for maintaining better environmental conditions.*
- ❖ Optimizing the usage of energy & all other resources. Wherever possible, solar energy will be utilized to the maximum extent.*
- ❖ Ensuring proper disposal of wastes to reduce impact on environment.*
- ❖ Complying with legal and other requirements.*
- ❖ Creating environmental awareness among Employees, Subcontractors & Suppliers to facilitate the implementation of EMS at Daiken Corporation.*
- ❖ Implementing and improving safety standards.*
- ❖ Maintaining green environment through plantation of trees, flora & fauna and lawns to ensure beautiful surroundings and*
- ❖ Reviewing the Environment Management System periodically to monitor the implementation of EMS & taking corrective and preventive action wherever required.*

*By effectively implementing the above, "**Daiken Corporation**" is proud of being a responsible organization contributing to Social welfare.*

*Our "**Daiken**" mineral fiber ceiling board consists of 70% reprocessed materials and Daiken Corporation constantly manufacturers and promotes environmental friendly products which contributes to a clean and green environment.*
